# TWEETY BOT

The all in one community tool

Tweety bot is a powerful first of its kind all in one telegram bot, which provides teams a way to incentivise their community for taking part in shilling and being active. Please take note of the below to understand how this works...

## ➡ Auto Raid

Tweety Bot will raid every tweet from the preset influencers and also those added by the admin with custom shill messages and provide the link in the chat telling everyone to raid their reply.

## ➡ Tweet Competition

Allows Admins to set a competition for the most active raiders, will record all data (twitter usernames) on a list and allow the admin to set a timer for when the competition ends and prize amount.

## ➡ Community Trending

This allows tokens to get trending dependent on the activity provided by the community, more higher your trending the more impressive your community truly is in return enticing further investment.

## How will Tweety generate revenue?

### ➔ Paid Subscription

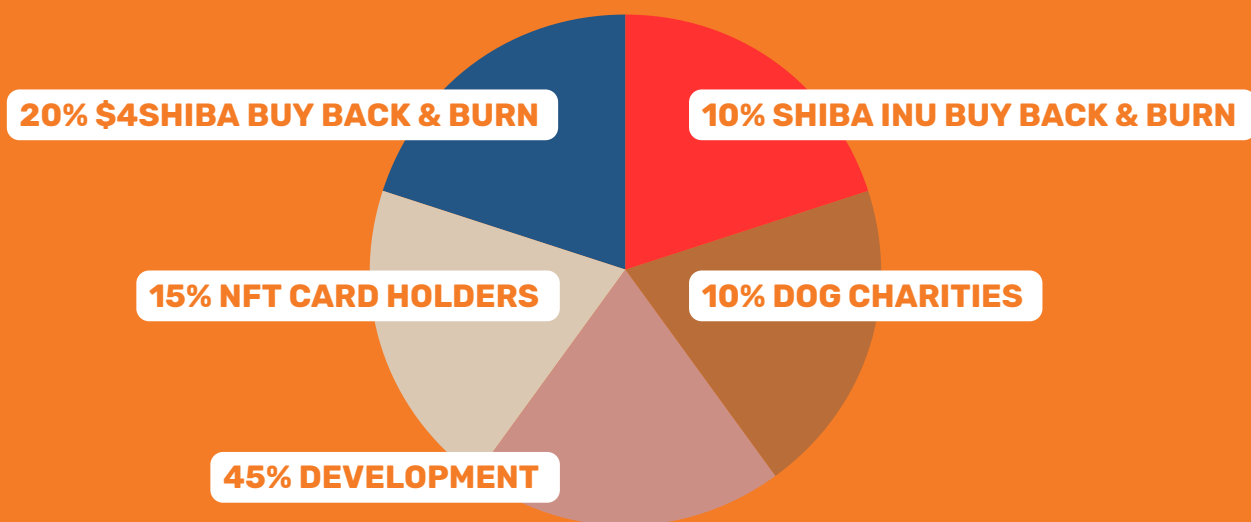

With every group Tweety is added to there will be a \$30 fee, per group this is a one month subscription.
